

Coding Challenge #3: Playing with Dates

This small coding exercise is designed to give you a little practice on Node.js. See if you can solve it on your own!

We'll cover the following

- Problem Statement
 - Sample Output:

Problem Statement

The `moment` package is very popular for managing dates and times. Load this package and use it to:

- Display the current date
- Compute the number of years since 1976, November 26th

Sample Output:

Current Date = Monday, November 12th 2018

No. of years since 1976-11-26 = 42 years ago

A screenshot of a code editor interface. On the left, a file explorer shows two files: 'index.js' (highlighted) and 'solution.js'. The main editor area displays a list of numbers from 1 to 9. The bottom toolbar includes a play button, a save button, a back button, and a full-screen button.

Use the moment [documentation](#) to discover how to use this package.
