

## More On Architecture Quiz – Part 2

This lesson contains a quiz to test your understanding of peer to peer architecture & the decentralized web.

Let's Test Your Understanding Of Peer to Peer Architecture & the Decentralized Web

1

What is the need for a peer to peer network? Which of the following option(s) are correct?

- ☐ A) All the participants/computers in the network can communicate with each other without the need of a central server. The absence of a central server rules out the possibility of a single point of failure.
- ☐ B) All the computers in the network have equal rights. No entity has the central authority to debar another entity out of the network.
- ☐ C) In a peer to peer network, no central entity has access to our data without our consent.
