

Author's Note

Author's note to the learners.

I will have failed if I haven't given you a sense of the true excitement and surprises in mathematics and computer science. I will have failed if I haven't shown you how school level mathematics and simple computer recipes can be incredibly powerful - by making our own artificial intelligence mimicking the learning ability of human brains.

I will have failed if I haven't given you the confidence and desire to explore further the incredibly rich field of artificial intelligence. I welcome feedback to improve this course.
