

Coding Challenge #6: FizzBuzz

This coding exercise is about finding multiples of 3 or 5 and returning appropriate message based on the result.

We'll cover the following ^

- Problem Statement
- Coding Exercise

Problem Statement

Write a program that shows all numbers between 1 and 100 with the following exceptions:

- It shows `"Fizz"` instead if the number is divisible by 3
- It shows `"Buzz"` instead if the number is divisible by 5 and not by 3.
- It shows `"FizzBuzz"` instead for numbers divisible both by 3 and by 5.

This exercise has [many, many solutions](#). It's a [job interview classic](#) that a significant number of candidates fail. Try your best!
