

Coding Challenge #1: Counting Clicks

In this coding challenge, you will cover an exercise related to mouse events, see if you can solve it on your own!

We'll cover the following

- Problem Statement

Problem Statement

Start with the following HTML content and write the JavaScript code that counts the number of clicks on the `myButton` button by updating the `clickCount` element. The `deactivate` button stops the counting.

If you get stuck, you can refer to the given solution!

Output

JavaScript

HTML

```
1 // Write-Your-Code-Here
2
```

Console

Clear
