

# High Availability Quiz

This lesson contains a quiz to test your understanding of high availability.

Let's Test Your Understanding Of High Availability

1

Which of the following statements is true in context to scalability & high availability?

- ☐ A) Scaling an application horizontally means getting rid of single points of failure & that means the application also becomes highly available.
- ☐ B) Scalability has no relation with high availability.
- ☐ C) Scaling an application vertically, augmenting the server power, makes it more highly available.
