

Quiz!

This quiz will test your knowledge of normalization and the different normal forms.

1

What is/are the goals of normalization?

- ☐ A) Be able to characterize the level of redundancy in a relational schema
- ☐ B) Provide mechanisms for transforming schemas in order to remove redundancy
- ☐ C) A and B both
- ☐ D) None of the above

COMPLETED 0%

1 of 5

We have reached the end of this chapter, good job! By now we should be familiar with the concept of normal forms and how to normalize a non-normalized table.

In the next chapter, we will dive deep into the concept behind Structured Query Language (SQL).
