

Coding Challenge #1: Adding a Paragraph

This coding exercise is design to test the concepts you have covered so far. Try to implement it on your own. If you get stuck, you can always refer to the solution provided in the "Show Solution" tab.

We'll cover the following

- Problem Statement

Problem Statement

Improve the languages example to add a paragraph (`<p>` tag) containing a link (`<a>` tag) to the URL:

https://en.wikipedia.org/wiki/List_of_programming_languages.

The final output should look like this:

Some languages for programming

- JavaScript
- C++
- Java
- C#
- PHP
- C
- Python
- Ruby

Here is a more complete [list](#) of languages.

Note: Before testing your code, please run the code by pressing the **RUN** button. Then, you can click the **TEST** button. Otherwise, the test cases won't pass even if the code is correct.

cases when it passes even if the code is correct.

Output

JavaScript

HTML

Some languages

- JavaScript
- C++
- Java
- C#
- PHP
- C
