

# Coding Challenge #1: Adding Character Experience

Given a code, can you add experience property to the character? Solve this exercise on your own.

## We'll cover the following

- Problem Statement

## Problem Statement #

Improve our example RPG program to add an experience property named **xp** to the character. Its initial value is 0. *Experience* must appear in character description.

```
1 var aurora = {  
2   name: 'aurora',  
3   health: 150,  
4   strength: 25,  
5   describe(){  
6     return `${this.name} has  
7     .strength} as strength a  
8   }  
9 };
```
