Coding Challenge #1: Word Info

This coding exercise is designed to test the concepts of Strings that you have learned so far.

Problem Statement

Write a program that returns length of given word, and its lowercase, and uppercase version.

Input

```
length("hello");
lowerCase("BrEak");
upperCase("LiVe");
```

Expected Output

```
5
'break'
'LIVE'
```

Coding Exercise

```
1  function length(word){
2      // Write - Your - Code
3  }
4
```

```
 5  function lowerCase(word){
 6      // Write - Your - Code
 7  }
 8
 9  function upperCase(word){
10      // Write - Your - Code
11  }
```
