Coding Challenge #5: Information about an Element

In this coding exercise, you will update the content of the web page by appending additional information about the existing HTML content.

Problem Statement

Write a program that adds to the page a list showing the height and width of the element identified by "content". Here is this exercise's HTML code and the associated CSS stylesheet.

The final output of your code must look exactly like this:

Information about the element

- Height : 57.6px
- Width: 98.5833px

ABC
Easy as
One, two, three

Output
JavaScript
HTML
CSS (SCSS)

ABC
Easy as

Console
