Coding Challenge #3: Number of Days in a Month

This little coding exercise is about writing a program that inputs a month and based on the input returns the numbers of days that month has.

Problem Statement

Write a program that accepts a month number (between 1 and 12), then shows the number of days of that month. Leap years are excluded. Incorrect inputs must be taken into account.

Input

```
Enter month number : 4
```

Expected Output

```
Number of days: 30
```
