Coding Challenge #1: Musketeers

This little exercise will test the concepts of Arrays that you have learned so far.

> **We'll cover the following** ∧
>
> - Problem Statement
> - Coding Exercise

Problem Statement

Do the following:

- Create an array named musketeers containing values - "Athos", "Porthos" and "Aramis"
- Add the "D'Artagnan" value to the array
- Remove poor Aramis

> 💡 **Did you know?**
>
> When an object is declared using `var` in JavaScript, it is automatically initialized as "undefined". Test the run case below before adding your solution to confirm!

Coding Exercise

```
1   var musketeers;
```
